Dear Sir,

**RE: IFCA D'PROJECT**

We would like to express our sincere appreciation to all your staffs who have helped with the implementation of D'Project.

In today's world, companies are looking for solution that is going to propel them ahead of their competitors. Choosing the right solution has been a difficult process, with many vendors to choose from. After reviewing the functionalities and features, only one solution stood out from the rest. We at Low Keng Huat chose IFCA's D'Project because of the after sales support, value for price, and user-friendliness.

The application allows users to manage and retrieve information effectively, and the system also maintained good security resource access controls.

D'Project is definitely a great choice and I would recommend this solution to any company that is looking to streamline their existing operations.

Thank you.

Yours truly,

Mary Yeo-Ong  
Group Accountant
