**IFCA Hotel Management software**

This is to state that we have been using IFCA hotel management software for the last five years, during which time we have received good support from IFCA.

We are particularly happy with the last installation which is running very smoothly from the time we went live. We are planning the installation of our next property as soon as the fiber optic network is completed, hopefully early August 2006.

Our experience with IFCA hotel management software has been very good and we are very satisfied with the support we receive from them.

With our very best wishes.

Yours faithfully

Ibrahim Zahir  
*MANAGING DIRECTOR.*
